

LIFETOPIA AND RESIDENTIAL MANAGEMENT SYSTEMS (RMS) JOIN FORCES TO PROVIDE COLLEGES AND UNIVERSITIES USING RMS HOUSING SYSTEM WITH ACCESS TO LIFETOPIA ONLINE SERVICE FOR ROOMMATE SELF-SELECTION

New York, NY - December 2, 2008 – Lifetopia, the provider of self-selection roommate and housing technology for colleges and universities worldwide, has joined forces with Residential Management Systems (RMS) to integrate its self-selection service as a new offering within RMS's collegiate housing software systems, which include housing inventory management, room assignment, billing, and more. Through the agreement, RMS's more than 150 college and university clients will now have access to utilize Lifetopia to enable their students to review and select their own roommates and choose from university-sanctioned housing options.

Lifetopia enables students to visit their college or university website to create an informational profile and peruse profiles of other registered students in order to select their own roommate(s). Then, together online, the roommates may select from available on and off-campus housing inventory sanctioned by the school. Colleges and universities using RMS systems will automatically receive students' self-selection results through seamless integration between Lifetopia and RMS.

"Together RMS and Lifetopia provide higher education institutions with a superior system that delivers far greater efficiencies and better student service across every aspect of the housing administrative process," said Bill Schneider, VP Sales, Lifetopia. "Housing and roommate selection is among the top concerns of students making decisions regarding their higher education. Giving students the ability to select their own roommate helps to ensure a better overall college experience, and that's a huge win for everyone involved."

"Students want and deserve the ability to select their own roommates and housing options," said Andrew Tanner, VP Sales and Marketing, Residential Management Systems. "By integrating Lifetopia's self-selection technology, every college and university that uses our management system will now have access to a seamless online service that will increase confidence in roommate assignments, reduce paperwork, yield higher occupancy percentages, and bolster overall student satisfaction."

About Lifetopia

Lifetopia is the world's leading provider of web-based roommate and housing services. Its fully-hosted, web-based plug-and-play applications serve college and university housing and student roommate needs, by enabling registered students to visit their University's website to self-select their roommate based on comprehensive information students provide in their profiles and within the University's specified housing parameters. Lifetopia's online housing and roommate services also enable property owners and landlords to advertise rental properties and secure tenants online. Founded in 1995, Lifetopia operates roommateclick.com, the safe secure site for roommate selection in the US, as well as other roommate and housing websites serving businesses, residents and students in the US, UK, France, and Germany.
